Mohamed Medhat Abdelfattah

Software Engineer | Frontend & Automation

mohamedmedhat.dev2232@gmail.com | +201110912198 | Portfolio | LinkedIn | GitHub

SUMMARY

Software engineer building responsive React and Next.js applications, REST APIs, and Python automation. Experienced in API integration, payment flows, frontend performance optimization, and automated UI testing.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, Vue.js, Redux, Tailwind CSS
Backend & data: Node.js, Express, REST APIs, MongoDB, SQL, Supabase
Automation & tools: Python, Selenium, Pytest, Docker, Git, CI/CD

EXPERIENCE

Huawei Feb 2025 - Present
Software Automation Engineer | On-site
- Automated 30+ hours of manual work per month with Python, reducing errors by 60%.
- Built Node.js REST APIs for internal tools and optimized SQL queries, improving API throughput by 35%.
- Implemented Selenium and Pytest UI automation, accelerating testing by 40%.

Skypoint Jul 2023 - Nov 2024
Frontend Engineer | Freelance
- Built and maintained a production React frontend with reusable components and secure Stripe payment flows.
- Integrated REST APIs with React Query caching and synchronization, reducing redundant API calls by approximately 35%.
- Improved load speed by approximately 20% through image optimization, code splitting, lazy loading, and asset compression.

Route IT Training Center Aug 2023 - Dec 2023
Backend Developer | Diploma
- Built a Node.js and MongoDB e-commerce platform with Stripe integration, supporting 100+ concurrent users.

SELECTED PROJECTS

The Wild Oasis - Cabin Booking Live demo | GitHub
Next.js, React, Supabase
- Built cabin discovery, booking management, and user profiles with authentication and access controls; optimized Supabase queries to reduce API latency by 30%.

The Wild Oasis - Operations Dashboard Live demo | GitHub
React, Supabase, Tailwind CSS
- Built an administration interface to manage cabins, users, and guest bookings, with charts that summarize booking activity.

Online Bookstore - Graduation Project (A+) Live demo
React, Node.js, Express, MongoDB, Stripe
- Built the storefront, product and order APIs, authentication, and Stripe checkout; developed a hybrid recommendation engine for book discovery.

Real-Time Chat App GitHub
React, Node.js, Socket.io, MongoDB
- Implemented chat rooms, instant messaging, and typing indicators in a responsive interface using Socket.io.

EDUCATION

B.S. in Computer Science | Cairo University Sep 2020 - Jul 2024
Graduation project: Bookstore Platform (A+)

CERTIFICATION & LANGUAGES

Course: The Ultimate React Course - Jonas Schmedtmann
Languages: Arabic (Native) | English (B2)
